

*"The ease with which we can produce reports for management on our hardware stock saves considerable time and gives us confidence on the accuracy of the information we are supplying." Peadar Smith*

## Cavan County Council Comhairle Chontae an Chabháin

### Why Cavan Needed Discovery

- Cavan has over 300 PCs located in 15 locations throughout Cavan. In 2006 IP phones were introduced, resulting in over 600 devices on the network
- Discovery's comprehensive data gathering capabilities provided Cavan with the foundation for a broad set of business planning tools to make effective business decisions
- Discovery allowed Cavan to find, audit and track all software and hardware throughout the full lifecycle of the asset
- The future possibility of integrating Discovery with their IT Helpdesk keeping users productivity and efficiency to a maximum

*"While Centennial Discovery was initially installed to solve our need to maintain an inventory of our network, we find that we are using it on a daily basis when troubleshooting user problems. The wealth of information it provides is invaluable." Peadar Smith*

### Benefits For Cavan County Council

- The ability to see every network attached device
- Drilldown to detailed hardware and software information
- Use of queries and reporting to produce filtered views
- Monitoring of Software licence compliance and identifying any unauthorised software installation
- Budgeting for future upgrades which may be required
